SUMMARY

Full-stack developer with 6+ years building React and Next.js applications, currently running a Houston web agency serving bilingual small businesses. Built and shipped 20+ production sites from the ground up — frontend, Node/Express APIs, PostgreSQL, and Vercel deployment — and own the measurement and paid-acquisition layer on top of them. Prior full-stack experience at Atser Systems in an Agile team environment.

EXPERIENCE

RC Web Solutions LLC — Founder & Lead Developer

Houston, TX · Sept 2022 – Present

- Built and deployed 20+ production Next.js sites for Houston-area businesses from the ground up, owning the full cycle from requirements gathering through post-launch maintenance.
- Developed REST APIs with Node.js and Express backed by PostgreSQL and Supabase, implementing JWT authentication, role-based access control, input validation, and rate limiting.
- Structured Express APIs into routes, controllers, and services with role-scoped middleware; validated requests with Zod schemas at the API boundary and returned structured errors rather than leaking exceptions.
- Designed and evolved PostgreSQL schemas through Prisma migrations across environments — orders, payments, variants, and status transitions — handling monetary values as integers in cents to eliminate rounding errors.
- Cut Largest Contentful Paint from 7–8 seconds to under 1 second on a high-traffic client site, restoring paid-campaign performance that had been degraded by load times.
- Implemented Meta Pixel with Conversions API across Next.js sites, including event deduplication, Advanced Matching, and Content Security Policy configuration.
- Resolved a platform quota overage (ISR writes 5x, CPU 3x over limit) by re-architecting revalidation; managed DNS and 301 redirect maps for WordPress-to-Next.js replatforms.

Atser Systems Inc. — Software Developer

Houston, TX · Nov 2024 – Apr 2025

- Built responsive web applications with Next.js, TypeScript, Tailwind CSS, and shadcn/ui, working from design specs through production release.
- Integrated C#/.NET REST APIs and connected frontend views to PostgreSQL for dynamic content rendering.
- Worked in a 5-person cross-functional Agile team — daily Scrum, sprint planning, and code review through Jira.

Revature — Software Developer

Houston, TX · Apr 2022 – Sept 2022

- Developed and maintained website features alongside senior developers; integrated third-party APIs and ran cross-browser compatibility testing.

Empresa Agropecuaria de Camagüey — Frontend Developer

Camagüey, Cuba · Sept 2015 – Feb 2017

- Built web applications and real-time operational dashboards for agricultural management systems with JavaScript, HTML5, CSS3, and Bootstrap.

GROWTH & PERFORMANCE MARKETING

- Manage Google Ads accounts with combined daily budgets exceeding \$250 across search, brand, and competitor-conquesting campaigns, operating at approximately \$19 cost per acquisition.
- Run Meta Ads lead campaigns achieving \$6.78–\$11.15 CPA, with disciplined budget scaling to preserve algorithmic learning phases.
- Restructured two ad accounts from broad match to phrase/exact ad group architecture with a 185-keyword shared negative list, and diagnosed a conversion decline as budget throttling using impression-share analysis.
- Manage Google Business Profile optimization and local SEO across 16 multi-location listings, with CallRail call tracking for per-campaign lead attribution.

SELECTED PROJECTS

Optical Ordering System

github.com/caballerorandy6/optical-ordering-system

Order management for optical shops: prescriptions, lenses, frames, partial payments, and balance tracking, with server-side role enforcement.

Stack: Next.js 16 (App Router, Server Actions), TypeScript, Tailwind CSS 4, shadcn/ui, PostgreSQL, Prisma 7, Better Auth (RBAC), Zod, Zustand, next-intl, react-pdf, Vitest

Óptica — E-commerce Storefront

github.com/caballerorandy6/optica

Bilingual eyewear storefront: variant catalog, cart, Stripe checkout with webhook confirmation, order tracking, and admin panel.

Stack: Next.js, TypeScript, Tailwind CSS, Radix UI/shadcn, PostgreSQL, Prisma, Stripe, JWT sessions (jose), Resend, next-intl

Limo Rental — Booking Platform

github.com/caballerorandy6/limo-rental-backend

Decoupled booking system: Next.js client plus a standalone Express REST API deployed independently, layered into routes, controllers, and services with separate auth and admin middleware.
Stack: Next.js, TypeScript, Tailwind CSS, Radix UI, Zustand, React Hook Form, Zod, Clerk, Google Maps API, Express, Prisma, PostgreSQL, Docker, Railway

RC Web Solutions Platform github.com/caballerorandy6/rcweb
Agency business platform: split-payment invoicing with PDF generation, SMS and email marketing automation, and analytics dashboards.
Stack: Next.js 15, React 19, TypeScript, Tailwind CSS, PostgreSQL, Prisma, NextAuth v5, Stripe webhooks, Twilio, Resend, OpenAI API, Upstash Redis, Vercel Blob, Playwright

CLIENT SITES IN PRODUCTION

gsmactx.com · clinicagessner.com · clinicahispanaaairline.com · clinica529.com · rcbeautysalon.org · dulceantojosnackcarts.com · ac-remodelingservice.com — Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, deployed on Vercel and Railway.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Radix UI, SASS, Bootstrap
Backend & Data: Node.js, Express, C#, REST API design, PostgreSQL, MySQL, MongoDB, Prisma ORM, Supabase
State, Forms & Auth: Zustand, Redux Toolkit, React Hook Form, Zod, JWT, OAuth 2.0, NextAuth v5, Better Auth, Clerk, Supabase Auth, RBAC
Infrastructure & Testing: Vercel, Railway, Docker, Git, GitHub, CI/CD, DNS, Vitest, Playwright, Jira, Scrum, Claude Code, GitHub Copilot
Analytics & Tracking: Meta Pixel & Conversions API, Google Ads conversion tracking, Google Analytics, Search Console, CallRail
Languages: Spanish (native), English (professional)

EDUCATION

Nova Southeastern University — Doctor of Education (EdD)	Fort Lauderdale, FL · May 2024 – Present
Nova Southeastern University — M.S., Education	Fort Lauderdale, FL · May 2021 – Apr 2024
Universidad de Camagüey — B.S., Software Engineering	Camagüey, Cuba · Graduated July 2012
